

**Apply for a position at Advanced Pressure Technology (AP Tech) of Napa.** We manufacture a wide array of gas handling components used primarily for the semiconductor industry. We offer great job opportunities with competitive salary and benefits for hard working, detail oriented, committed people.

We are accepting resumes for an experienced Quality Control Supervisor.

### **Quality Control Supervisor**

Manage all quality control inspection activities of workers engaged in inspecting incoming materials, in-process materials, and finished products to ensure adherence to company quality standards and customer specifications. Interface with suppliers and other departments on product quality issues, coordinating nonconformance reviews with engineering, initiating corrective and preventive actions. Initiate MRB review and in-house rework of supplier-provided parts that do not meet specifications. Assist Quality Assurance and Purchasing in conducting new supplier evaluations. Ensure proper inspection equipment is available and maintained. Train inspectors in established Quality Assurance procedures and operation of inspection equipment to carry out inspection requirements.

Provide employee performance evaluations and counsel employees on their job performance and compliance with AP Tech policies. Will assist with harassment issues, employee interaction, and safety issues.

The ideal candidate should possess strong communication and interpersonal skills, previous background in print reading, GD&T, and mechanical inspection required. Experience working in an ISO9001-based quality system and knowledge of basic quality assurance concepts. 3-5 years' experience as a Quality Control Supervisor or Lead preferred. Background in machining a plus.
